Java - Wikipedia

Java is a class-based, object-oriented programming language that is designed to have as few implementation dependencies as possible. It is a general-purpose computer programming language that is designed to be as simple as possible to use, robust, secure, architecture-independent, and portable. It is also designed to be simple to use, robust, secure, architecture-independent, and portable. It is also designed to be simple to use, robust, secure, architecture-independent, and portable. It is also designed to be simple to use, robust, secure, architecture-independent, and portable. Jan 7th, 2018

Distributed Hash Table - Wikipedia

A Distributed Hash Table (DHT) is a class of a decentralized distributed system that provides a lookup service similar to a hash table: (key, value) pairs are stored in a DHT, and any participating node can efficiently retrieve the value associated with a given key. Responsibility for maintaining the mapping from keys to values is distributed among the nodes, in such a way that a change in the ... Jun 7th, 2018
